

Xperate

WHO ARE XPERATE?

Xperate are a Fliplet approved development, consultancy and implementation partner; meaning you can have full confidence in us working together to deliver the best results for your project.

Put simply - we help to get the very best out of your Fliplet mobile app in a range of different scenarios that will be unique to your organisation.

It is difficult to find good developers, expensive to recruit them and then hard to manage and retain them; especially if mobile software development isn't your primary business.

We have a breadth of experience, with a specialism in Legal Technology, counting a significant number of law firms and legal technology vendors among our client base.

Our executive team, led by founders Simon Hill and Mark Garnish, have developed relationships over the years with over 1,500 law firms globally, including many of the Global Top 100, for whom we have developed a number of market leading enterprise solutions.

WHAT WE DO

Xperate work with you to design, prototype and build a solution that fits with what you want. This could be a small project, such as a Lawyer Capacity Tracking app used by your employees, or an external facing Client Legal Services Directory and Inception app. We can build almost everything you can imagine and provide seamless integration with your existing systems.

Our bespoke development service includes:

- Solution Design
- Development
- Testing
- Deployment & Support

Xperate allows firms of all sizes to have access to design and development expertise without the commitment of employing developers, leaving you to get on and do what you do best - managing your firm.

SOFTWARE WITHOUT COMPROMISE
